WHY CASCADE SHELTER

Designed for Real Outdoor Living.

High-luxury outdoor structures have long been reserved for custom builds and extreme price tags. Cascade Shelter was created to bridge that gap.

We design modern aluminum pergola systems inspired by premium architecture, engineered for real homes, real climates, and real budgets. Our approach delivers the look, performance, and durability of high-end outdoor living without unnecessary complexity or inflated costs.

Every structure is designed with intention. Clean lines. Purpose-built strength. Smart features that actually improve how you use your space, season after season.

This is modern outdoor living, made practical.

Built With Local Partners

We proudly partner with local contractors and builders to deliver professional installation and long-term support. That means real people, real accountability, and quality you can trust.

Cascade Shelter combines globally engineered systems with local craftsmanship so your outdoor space is built right the first time, and supported long after installation.

For the Everyday Homeowner.

RIDGE SERIES

The **Ridge Series** is our most popular pergola line, engineered to deliver strength, style, and reliability in a streamlined motorized louver system. It offers excellent sun, rain, and airflow control while maintaining a clean, modern profile ideal for most residential applications.

Designed for homeowners who want performance without overcomplication, Ridge delivers **exceptional value** without sacrificing **build quality** or **aesthetics**.

Best for:

- Standard residential patios
- Moderate wind and snow conditions
- Homeowners seeking value and clean design

Balanced performance for everyday outdoor living.

SUMMIT SERIES

The **Summit Series** is built for environments that demand more. With reinforced structural components and enhanced weather resistance, Summit is designed to handle higher wind loads, heavier snow, and long-term exposure without compromise.

This series is ideal for premium installations, challenging climates, or homeowners who want **maximum durability** and **peace of mind**.

Best for:

- High-wind or heavy snow regions
- Larger spans and premium installations
- Long-term performance and structural confidence

Engineered for higher loads and elevated expectations.

INTEGRATED DRAINAGE DESIGN

RAINWATER DIRECTION

DRAINAGE OUTPUT

Angled louvers allow light and airflow while blocking rain and heat, with an upgraded design for a tighter seal.

4000K LED lighting provides bright, even illumination and integrates seamlessly with the louver controls.

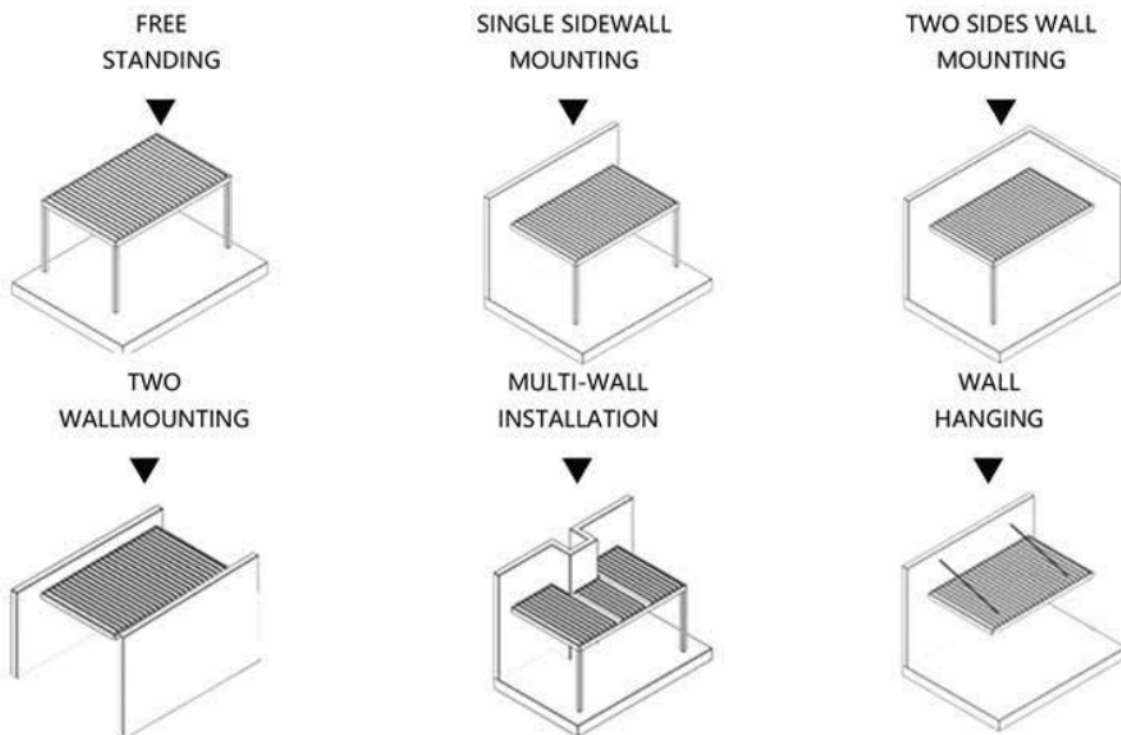

An enlarged gutter improves drainage for reliable waterproof performance in heavy rain.

Waterproof motorized operation with both remote control and wall switch.

BUILT GLOBALLY. CONTROLLED LOCALLY.

Cascade Shelter manufactures components overseas while maintaining direct control over quality and accountability.

To ensure every pergola meets our standards, we hire independent third-party inspectors to oversee materials, production, and final assembly. These inspectors work on our behalf to verify structural integrity, finishes, and mechanical systems before any shipment leaves the factory.

Built -To-Order

Our pergolas are built to order, with a typical lead time of 3–4 weeks. This timeline includes a dedicated inspection of your structure prior to shipment, ensuring each system meets our quality requirements before it is delivered.

Working Conditions & Accountability

Third-party inspectors also verify basic working conditions and factory practices, providing documented reports during production and prior to shipment.

What We Inspect

- Aluminum grade and material thickness
- Structural components and connections
- Motorized and electrical systems
- Finish quality and coatings
- Packaging and shipment readiness

If Your Pergola Arrives Damaged

In the rare event of shipping damage or missing components, Cascade Shelter will:

1. Assess the issue promptly
2. Provide replacement parts at no cost
3. Coordinate resolution until the issue is fully addressed

We stand behind every structure we deliver.

Cascade Shelter started at home. Literally.

Like a lot of families, everything shifted after 2020. Life slowed down. Time turned inward. Evenings moved closer to home, weekends spilled into the backyard, and we started realizing that this was our version of living well.

When we started our own family, that feeling only grew stronger.

We found ourselves spending more time outside. Hosting friends. Grilling. Sitting under cover while it drizzled (because Pacific Northwest). Trying to make the most of the space we already owned, especially as time became more valuable.

What we didn't expect was how expensive it had become to do that well.

Why should enjoying your own backyard feel like a luxury reserved for the ultra-rich?

Community First

As Cascade Shelter grows, our goal is to be more than just a place to buy outdoor structures.

We believe small, local businesses matter, especially in 2026. They're run by real people, supporting their families, showing up for their communities, and doing honest work that deserves respect. By building strong relationships across the supply chain, everyone benefits. Homeowners get better value and service. Local businesses gain meaningful work. Skills and craftsmanship stay close to home.

We keep our approach simple and flexible, focused on long-term partnerships, not rigid systems.

Our Vision

Our vision is simple.

Help people enjoy the space they already have and help local builders deliver it better.

Cascade Shelter bridges homeowners, local contractors, and a trusted supply chain to make high-quality outdoor spaces accessible without inflated pricing or hidden markups.

We're not here to sell structures. We're here to connect people, products, and partners so outdoor living actually makes sense.

Our Commitment to You

Every Cascade Shelter structure is built to last. We stand behind the quality of our aluminum pergola systems with a two-tiered warranty that covers both the structure and its electronic components. All warranties apply to residential installations only and are non-transferable.

10-YEAR LIMITED STRUCTURAL WARRANTY

10 YEARS

What Is Covered

- Structural frame, posts, and beams
- Louver blades
- Defects in materials and workmanship

Electronics covered separately by manufacturer (3 years)

LIMITED LIFETIME STRUCTURAL WARRANTY

LIFETIME

What Is Covered

- All Tier 1 structural components
- Valid for original purchaser's ownership
- Defects in materials and workmanship

Available as a premium add-on. Ask for details.

WHAT IS NOT COVERED

- **Improper Installation:** Damage from installation not following the official Cascade Shelter instruction manual.
- **Acts of Nature:** Flooding, tornado, hurricane, high winds, earthquake, lightning, or other force majeure events.
- **Normal Wear & Tear:** Fading, chalking, or paint damage caused by normal weathering and sun exposure.
- **Misuse or Modification:** Damage from unauthorized modifications, non-original spare parts, or improper cleaning.
- **Commercial Use:** This warranty is valid for residential installations only. Commercial use voids coverage.

HOW TO MAKE A CLAIM

- 1 **Contact Us:** Email support@cascadeshelter.store or visit www.cascadeshelter.store
- 2 **Provide Proof of Purchase:** Include your order number or transaction number.
- 3 **Describe the Issue:** Provide a detailed description and photos or video of the defect.
- 4 **Resolution:** We will repair or replace the defective component at our discretion.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. Cascade Shelter disclaims all other representations and warranties of any kind, express or implied. This warranty excludes all consequential damages. Regular maintenance is required to maintain warranty coverage.
